SAD ACCIDENT.

MR, OSCAR CRAIGG Blown up by a Prememature Blast in the Resendate Coment
Quarry—DESTRUCTION of an EYE—
Its Subsequent Removal by Surgical Operation.

Mr. Oscar Craigg was foreman in a coment quarry at Rosendale, Ulater Co., N. Y. By an explosion
one day in the quarry, he lost an eye—lost it totally.
Under the impression that the matter was loss serious, the local physician told Mr. Craigg that his
eye was not lost wholly, but could be saved by treatment. The experiment was tried and falled.
Worse remained behind, for he was in danger
of louing the other also, through sympathetic of losing the other also, through sympathetic inflammation. In this strait he consulted DR. DAVID KENNRDY, of Rondom, N. Y., who told him the injured eye must be taken out to save the other. To this Mr. Craigg demurred, and went back home in doubt. His local physician said: "Go to New York." To New York the patient went, and one of the most sunheaut centrals in the country.

Working ozen—Sales of 1 pr girth 6ft 10in 3000, at \$155; 1 pr girth 7ft. live weight 3200 lbs, \$157.

Milch cows. Extra, \$55@75; ordinary, \$20@50; springers, \$20@650; farrow cows \$16@31 each. We note sale of 3 new milch cows, \$35 each; 2 cow and calf, \$120; 1 cow and calf, \$50; 1 new milch cow, \$67.50.

Veal Calves in fair demand at 3@6%c per lb live weight.

Sheep and Lambs—Those from the West landed at Brighton sell at from 6 to 6%c. per lb., iwe stern spring lambs, from 8 to 9e, per lb., live weight. All owned by butchers, none being offered in the market for sale.

Swine—Fat Hogs—Prices 7%—@8% per lb. Sheep and Lambs—Those from the west landed at Brighton sell at from 6 to 6%c. per lb., ive weight. All owned by butchers, none being offered in the market for sale.

Swine—Fat Hogs—Prices 7%—@8% per lb. live weight. Spring pigs, \$2 to \$5 50 each shoats, 7 to 9e per lb., live weight.

Boston, Wednesday, June 7.

WOOL—The sales of the week have been 1,200,000 lbs of all kinda. We quote sales of Ohio and Penn., feeces at 40@43%c for X and XX, with some very choice selections at 44@450; Wisconsin and Michigan fleeces at 39@40c, and No. 1 fleeces at 41@410 per lb, the latter price for Ohio. In combing and delaine selections problem and ooarse unwashed combing is dull, and the best Kentucky is not salable over 25@ A320 per lb. In unwashed fleeces the business has been moderate and prices unchanged. The sales have been principally in the range of 25@320 per lb for fine and medium grades, with some choice medium selections at high prices. California Wool is quiet, at 13%@20 per lb for fall, and 26 for spring.

Twenty-Six Seasons, and still in Advance of all other Ma chines in Fewness of Parts and Great Simplicity.

Will do all practical work that can be done in the hay-field, carries all weight on the drive-wi Will do all practical work that can be done in the hay-field, carries all weight on the drive-wheels, giving all weight of the machine for driving power to the cutter, and does not load and lug the borses' necks as other machines do, with a heavy dragging frame in front of axis. Does not lift the cutter-bar in draft, which is other machines makes higher out when going up hill or when the team pulls hard. Makes even work up hill, down hill, and over hummooks and cradie holes and in heavy bottoms. Has the DOUBLE HINGE JOINT, giving perfect flexibility to the floating cutter-bar. Has but a single lever which lifts only the cutter-bar and this higher than any other machine. In all situations and unsier all circumstances maintains the LEVEL CUT, leaving a short, even stubble in all parts of the field. 'Has LESS MACHINERY & FEWER PARTS than any other machine, and no extra levers. From its GREAT SIMPLICITY can be understood and kept in order by the ordinary farm-hand.

HAS NO MYSTERY OF CEARING. The bar folds flat across the frame and the machine can be put entirely out of goar, making it as SAFE AS A FARM WAGON when on the road or going from field to field. No loose shaskling swivels or superfluous levers constantly liable to get out of order. The BUCKEYE is ALWAYS IN ORDER and always ready for work, and will STAND MORE ABUSE with less injury than any other machine and cost

Valuable Patented Improvements for 1882, y which the SHEAR-CUT, so escential to the perfect working of the mower, is SURE TO BE MAIN-AINED DURING THE WHOLE LIFE OF THE MACHINE, insuring light draft and causing the BUCKEYE to cut as well after years of use, as when the cutters are now. These well-tested and continually improved merits and staunch qualities have made the BUCKEYE THE STANDARD. The highest claim of other machines is that they are equal to the BUCKEYE. The BUCKEYE, with its FEW PARTS and GREAT SIMPLICITY will de ALL WORK and a GREATEE VARIETY OF WORK THAN ANY OTHER MACHINE; bence it is the BEST AND CHEAPEST, AND THE ONLY MACHINE A FARMER SHOULD THINK OF BUYING. Be sure and send for Circular describing improvements for 1883.

The Secret

of the universal success of Brown's Iron Bitters is simply this: It is the best Iron preparation ever made; is compounded on thoroughly scientific, chemical and medicinal principles, and does just what is claimed for it-no more and no less.

By thorough and rapid assimilation with the blood, it reaches every part of the system, healing, purifying and strengthening. Com-mencing at the foundation it builds up and restores lost health-in no other way can lasting benefit be obtained.

7) Dearborn Ave., Chicago, Nov. 7.
I have been a great sufferer from a very weak atomach, heartburn, and dyspepsia in its worst form. Nearly everything I are gave me distress, and I could eat but little. I have and I could eat but little. I have tried everything recommended, have taken the prescriptions of a doesn physicians, but got no relief until I took Brown's Iron Bitters. I feel none of the old troubles, and an a new man. I am getting much stronger, and feel inter-rate. I am a railroad engineer, and now make my trips regularly. I can not say too much in praise of your wonderful medicine. D. C. MACK.

A Bethel correspondent of t

crat in the issue of May 23 follows: "Charles Houghton o Pond, lost a young child by drin from a cow fed on cotton seed r nave taken some pains to inve ilch cows, and as nearly as seen able to ascertain the circ vere as follows: Sometime last child appeared to be well until it weeks old when it was atta regularity of the bowels and d end of two weeks. It was after ertained that the cow which milk for the child had bee ese two weeks, on cotton seed is also reported that there was a may be that less experienced pe charge of the child when it was The mother was very sick and care for it and died about the ence against the cotton seed me ly circumstantial and weak. We feeding cotton seed meal to mile the past three years; have used in our own family for children as and have supplied other familie have never heard any complaint milk disagreed with any one. Ma The Democrat correspondent fur

al into four quarts of milk. ant lost two in the same way." ton seed given in milk or water is to the digestive organs of a ve calf, and so is every other highly trated food. We have just turn three months old calf to pasture been brought up without milk. weeks old, we fed him on oatflour gruel. Since that time we ded one pint of cotton seed meal two feeds, and we have rarely calf to make better growth or g pasture in better condition. Th correspondent referred to, closes by remarking that, "two quarts of one of cotton seed meal make feed." Does he mean to be un that the above quantity makes single feed for a calf? If not wha mean? The fact is, there is much i in the community with regard to and proper method of feeding of seed meal to different animals, an not surprising, for it is comparnew feeding substance. But against its use should not be made they can be sustained by facts, and should be careful how they rush is with instruction for the public u

by putting two handfuls of ed

A correspondent of a New H paper speaks of a gentleman lambs "by allowing them to con they would of cotton seed meal," this circumstance as an argument its use. Is it any wonder the law under such treatment, and would same result have followed the corn meal or any other highly co ted food ad libitum? But cotton a tains nearly three times as much ted (hulled) cotton seed meal ne times as much. Cotton seed mes poison as some seem to suppose; be fed to all animals with care, and all to very young animals until gestive organs are in a condition t and assimulate food more conc than their natural pabulum which Prof. J. W. Sanborn of the New shire Agricultural College, who l using cotton seed meal for sever and has fed out first and last, ove tons, in a communication to the Pa People says: "I have fed it to she calves, cows and steers and reg very valuable food when rightly u only when rightly used; and very or dangerous when injudiciously usualimited amounts it will kill pig and lambs when quite young and hals just starting in life, cott meal, and after a few weeks, say f three weeks, only a little, grade creasing it, but never making it a f on to young beasts, nor to when the ration of grain exceeds

pounds. This is enough of this n my purpose of animal production. A correspondent of the Southern inder the head of "Cotton Seed M conducted experiments as follows: "On 26th of February last, we to two-year-old grade Shorthorn at thin order, from the field where the run all the winter, to a rick of straw, with small daily feed of po-lodder, with twenty other cattle

age.
These steers were put in the bewith twenty other (cows and helfer calf.) ran to straw ricked in the yifed stalk fodder every morning on out of the stalls; they were stalle successive nights before they were ed, and fed one quart of shelled coron about half a bushel to three pehaffed wheat straw, night and myith a feed of stalk fodder at night der to get a uniform fill on them.
On the lat day of March they was follows: No. 1, 875 lbs.; No. 2, 7 Mo. 3, 712 lbs.; No. 4, 680 lbs. The then stalled every night about su
